

WIREGRASS

ARCHAEOLOGICAL CONSULTING

Wiregrass Archaeological Consulting, LLC (Wiregrass) is a certified small business based out of Dothan and Orange Beach, Alabama. Established in 2007 by Justin Stickler, Wiregrass has conducted all phases of cultural resources assessments throughout the Gulf Coast states. Wiregrass has completed a wide range of projects in a variety of sectors and has a demonstrated ability to partner with other firms to provide the most efficient, cost-effective services to our clients.

Justin Stickler, Program Manager, is a registered professional archaeologist with 13 years of experience in cultural resources management and academic archaeology in the Southeast. He has overseen numerous projects throughout the Gulf States and authored more than 50 technical reports. Sarah Price is Senior Archaeologist and possesses more than 10 years of experience in cultural resources management and academic archaeology in the Southeast. Price has overseen more than 90 projects and authored more than 50 reports, as well as a number of professional publications and presentations for professional conferences. Both Stickler and Price are SOI-Qualified Archaeologists pursuant to 36CFR, Part 61, Appendix A. The remaining Wiregrass staff consists of highly skilled archaeological technicians with a minimum of a B.A. Anthropology/ Archaeology or related field and at least one year of experience conducting fieldwork and laboratory analysis, and they possess extensive experience throughout the Southeast.

Specialized services include detailed lithic analysis, archaeobotanical analysis, and GIS services. Wiregrass maintains a variety of specialized equipment, consisting of Topcon GMS-2 sub-meters units, Total Station, and a mobile power screen perfectly suited for data recovery projects.

During the past three years, Wiregrass has been involved in various aspects of emergency response. Stickler has worked as the Alabama SHPO Liaison and Historic Properties Specialist Representative for the Mississippi Canyon (MC252) Deepwater Horizon Oil Spill Response and is imbedded within the Incident Command System. This position has afforded Stickler the opportunity to work

closely with and to establish or strengthen relationships with the United States Coast Guard, the U.S. Fish & Wildlife Service, The National Park Service, and SHPOs from Gulf Coast States as well as tribal liaisons and tribal coordinators. Stickler has also participated in numerous Trustees Consultation meetings throughout the MC252 Response.

In addition to emergency response activity, Wiregrass is currently contracted on a variety of projects in Alabama, including several Alabama Army National Guard projects (Phase I & II) and a 5-yr IDIQ for the National Forests in Alabama. Wiregrass is also working on a significant coastal prehistoric site in collaboration with numerous other entities and is conducting public archaeology outreach at this site.

Wiregrass is poised to efficiently conduct cultural resources assessments independently or to team with larger partners. Wiregrass employees work out of home offices in Auburn, Dothan, Mobile, and Orange Beach, Alabama. We employ a core group of permanent staff and effectively add field crew or specialists to projects as necessary, utilizing teaming partners to fulfill project needs. Both of these approaches contribute toward a low overhead, enabling Wiregrass to maintain a competitive edge on small to mid-size projects and to be a key partner in large-scale or specialized projects.
